Authorization for this examiner's amendment was given in a telephone interview with D. Benjamin Esplin on 04/17/2008.

3. The application has been amended as follows:

A. In the claims:

- a. Claims 1, 3, 4, 8, 9, 11, 12, 14, 16, 17, 19, 20, 22, 24 and 25 are allowed.
Claims 2, 5-7, 10, 13, 15, 18, 21 and 23 are cancelled.

- b. Claim 1. (currently amended) A method for monitoring hardware information associated with a plurality of distinct network devices in an enterprise system, comprising:

invoking a flexible configuration file, the flexible configuration file comprising a first location directive to retrieve parameters from a first network device and a second location directive to retrieve parameters from a second network device, the first network device comprising a first device type and the second network device comprising a second device type;

remotely retrieving real-time hardware information associated with (i) the first network device based on the first location directive and (ii) the second network device based on the second location directive, the hardware information including parameters related to one or more hardware characteristics of the first network device or the second network device, wherein remotely retrieving real-time hardware information associated with (i) the first network device based on the first location directive and (ii) the second network device based on the second location directive comprises polling the first network device and the second network device based on a polling configuration file, the polling configuration file comprising separate polling intervals for individual ones of the parameters related to hardware characteristics;

enabling selection, by a user, of the first network device or the second network device;

dynamically presenting the real-time hardware information associated with the selected network device through a display, the display comprising a first and a second window, the first window comprising a hierarchical tree structure of user-selectable hardware characteristics of the selected network device, the second window comprising a tabular display of information associated with a hardware characteristic selected by the user in the hierarchical tree structure of the first window.

c. Claim 9. (currently amended) An electronically readable storage medium, the medium comprising instructions that control one or more processors to:

invoke a flexible configuration file, the flexible configuration file comprising a first location directive to retrieve parameters from a first network device and a second location directive to retrieve parameters from a second network device, the first network device comprising a first device type and the second network device comprising a second device type;

remotely retrieve real-time hardware information associated with (i) the first network device based on the first location directive and (ii) the second network device based on the second location directive, the hardware information including parameters related to one or more hardware characteristics of the first network device or the second network device, wherein remotely retrieving the real-time hardware information comprises polling the first and second network devices based on a polling configuration file that specifies separate intervals for individual ones of the parameters related to the hardware characteristics; and

dynamically present at least of a portion the real-time hardware information through a display.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The following is an examiner's statement of reasons for allowance:

Applicant's arguments that Kekic, Fung or Rivette do not teach the polling the first and second network devices based on a polling configuration file that specifies separate intervals for individual ones of the parameters related to the hardware characteristics" in the context of "separate intervals for individual ones of the parameters *related to*" the network element and/or its components" are

persuasive, as presented in response dated 02/21/2008. None of the prior arts of record teach or fairly suggest the claimed limitations.

Specification page 6, line 15-20 and page 7, line 18-21 were consulted to verify the compliance of claims 9 and 17 with 35 U.S.C. § 101.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
